Experience

Dutch Rose Media | Eindhoven

UX Designer Intern | 02/2025 - 06/2025

During my internship at Dutch Rose Media, I redesigned the company website to improve clarity, branding, and user experience using Figma. I conducted user and competitor research to support design decisions and navigation improvements while collaborating with external partners and participating in feedback rounds. On the side, I edited promotional AR/VR videos for events and client showcases using Sony Vegas Pro and supported the company's marketing team.
